EMPLOYMENT TIMELINE

August 2009 – September 2011: ABB (Lake Mary, FL)

A family situation required my return home to North Carolina regularly where ABB did not have any positions.

September 2011 – February 2013: Sandvik (Greater Raleigh/Durham Area, NC)

The role was manufacturing focused. I value that experience and draw on it daily, but I missed design work, and no design roles were on the horizon.

February 2013 – August 2014: Newell Rubbermaid / Piedmont Hardware Brands (Charlotte Area, NC)

Private equity purchased my division and moved Engineering to Dallas. I was not interested in relocating to Dallas at the time.

August 2014 – March 2017: Ingersoll Rand (Charlotte Area, NC)

A serious health issue required relocation to Raleigh-Durham for treatment.

March 2017 – May 2019: ABB (Raleigh, NC)

My position was outsourced as part of a cost-reduction effort, and I was laid off.

May 2019 – September 2020: Surround Medical Systems (Raleigh/Durham Area, NC)

Laid off during the COVID-19 downturn.

November 2020 – December 2021: True Digital Surgery (Goleta, CA)

My wife's career took us to San Francisco, and True Digital did not support remote work. I took on contracting work while we got settled in San Francisco and I looked for a full-time position.

June 2022 – April 2025: Swope Design Solutions (San Francisco, CA)

Consulting was varied and hands-on, but I missed long-term product ownership and a higher level of responsibility within a company.

April 2025 – October 2026: Nevados Engineering (Oakland, CA)

Nevados eliminated almost all employees and I was laid off.
